

Industry: Automotive Suppliers
Application: Stamping
Material(s): Carbon steel
Product(s): Steel-belt conveyor, scrap loadout system

Application Profile

Scrap Load Optimization

Situation

- When building a new facility in Vincennes, Indiana, Futaba asked Mayfran to supply a reliable, trouble-free system that would fill their hoppers evenly and consistently similar to other systems that we have provided them around the world.

Mayfran Solution

- Steel belt central scrap conveyors
- Automated hopper scrap loadout system

Key Features

- Cost-effective, automatic swivel chute

Customer Benefits

- Roll-off hoppers are now loaded automatically. No operator input is required.
- Swivel chute provides evenly loaded containers

Outcome

- Futaba receives top dollar for their scrap due to the fact that hoppers are always full and fewer pick-ups (or “pulls”) are required by their scrap hauler.
