

New ConSep[®] Flex System – One Size Fits All

- Combines 3 chip removal technologies in one package
 - Hinged steel belt conveyor for most chips & turnings
 - Drag (scraper) conveyor to handle fines
 - Magnetic bed to attract ferrous fines for capture by scraper
- Self-cleaning drum filter cleans coolant
 - Extends coolant and tool life
 - Reduces tank cleanout frequency and costs
 - 50 µm filtration for non-ferrous; captures ferrous fines

Handles the full range of chip, coolant, and material types
