

APPLICATION PROFILE – SCRAP LOAD OPTIMIZATION

INDUSTRY: Automotive Supplier

MATERIAL(S): Carbon Steel

APPLICATION: Stamping

PRODUCT(S): Steel Belt Conveyor; Scrap Loadout System

SITUATION

When building a new facility in Vincennes, Indiana, Futaba asked Mayfran to supply a reliable, trouble-free system that would fill their hoppers evenly and consistently similar to other systems that we have provided them around the world.

MAYFRAN SOLUTION

Mayfran steel belt central scrap conveyors with automated hopper scrap loadout system.

CUSTOMER BENEFITS

- Cost-effective, automatic swivel chute
- Roll-off hoppers are now loaded automatically. No operator input is required.
- Swivel chute provides evenly loaded containers

OUTCOME

Futaba receives top dollar for their scrap since hoppers are always full and fewer pick-ups (or “pulls”) are required by their scrap hauler.
