

## APPLICATION PROFILE – RELIABLE HIGH-VOLUME SCRAP MANAGEMENT

**INDUSTRY:** Automotive OEM

**MATERIAL(S):** Carbon Steel

**APPLICATION:** Stamping

**PRODUCT(S):** Steel Belt Conveyor; Scrap Loadout System

### SITUATION

---

Toyota has stamping facilities throughout the U.S. and Canada producing body panels and chassis components. Reliability is of the utmost importance. Any downtime related to a scrap handling system would be unacceptable.

### MAYFRAN SOLUTION

---

Mayfran has worked to develop reliable solutions to many challenges posed by this customer. Each of their facilities has unique characteristics. The reliability of our equipment and our ability our extensive stamping scrap handling experience has led to a lasting relationship.

### CUSTOMER BENEFITS

---

- Evenly loaded trailers are critical - customer is capable of filling a 40' trailer in under 30 minutes.
- Trailers filled to maximum capacity means fewer trips for the scrap hauler. This translates to higher scrap value for the manufacturer.
- The automatically operated equipment does not require any operator attention.

### OUTCOME

---

Toyota had selected Mayfran to supply loadout systems for all of their North American facilities.
