

CONSEP PRO CONVEYOR

The ConSep® Pro offers our **most advanced chip removal** and **coolant cleaning** utilizing innovative metal chip removal features that are designed to handle strings and turnings in a low-profile footprint.

THE NEWEST ADVANCEMENT IN CONSEP TECHNOLOGY

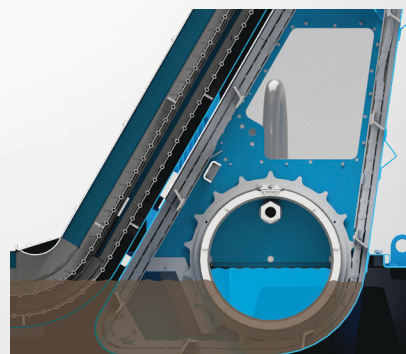

FEATURES AND BENEFITS

- Handles most chip types and materials with a dual belt configuration
- Advanced chute/trough design handles high coolant flows while maintaining a low-profile footprint
- Increased machine uptime
- Reduced coolant tank maintenance
- Extended coolant, pump and tooling life
- Permanent self-cleaning filter media with backwash spray to clean coolant to 30-micron nominal

HOW IT WORKS

- The primary conveyor removes all chip types and sizes including strings and turnings
- Patent-pending trough system is designed to flow fines and coolant to the secondary drag conveyor
- A permanent self-cleaning media drum separates the fines from the coolant to 30-micron nominal

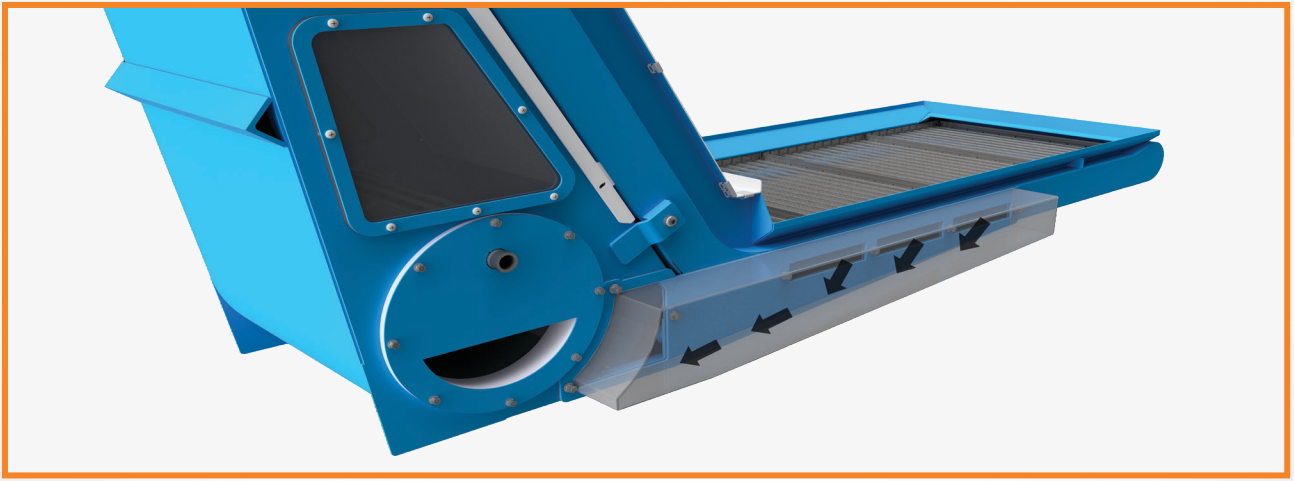

QUALITY, BUILT IN.
